

**Diane Pribojan**  
*House at 35mph*

In my art I have focused on the house as a subject for many years and I am still surprised and am able to find inspiration continually from focusing on the house. For me the idea of motion meant that either my subject was moving or I was moving. In this photo I was moving in a drive-by and although not a new concept I felt that it fit the subject of the show "Motion".
